

This listing of claims will replace all prior versions, and listings, of claims in the application:

The Status of the Claims

1. (Canceled)
2. (Currently amended) The door of ~~claim 1~~claim 15, wherein the door member ~~is~~comprises a second door panel that is movable.
3. (Currently amended) The door of ~~claim 1~~claim 15, wherein the door is associated with a wall ~~that helps define~~having a doorway, and the door member is stationary and adjacent to the wall.
4. (Currently amended) The door of ~~claim 1~~claim 15, wherein the door is associated with a wall and a floor that define a doorway, and the door member is comprises an upwardly facing surface of the floor.
5. (Currently amended) The door of claim 4, wherein at least a portion of the air outlet is situated to discharge at least a portion of the air toward the floor, whereby the air discharged from the outlet may help keep the floor dry.
6. (Currently amended) The door of ~~claim 1~~claim 15, wherein the air inlet, the air outlet, and the elongate passageway remain in fluid communication with the atmosphere when the door is closed.

7. (Currently amended) The door of ~~claim 1~~claim 15, wherein the blower continues to force air through the air passageway when the door is open.

8. (Currently amended) The door of ~~claim 1~~claim 15, wherein the blower moves with the door panel.

9. (Currently amended) The door of ~~claim 1~~claim 15, further comprising a flexible hose that couples the blower to the inflatable seal.

10. (Currently amended) The door of ~~claim 1~~claim 15, wherein the door panel translates relative to the door member.

11. (Currently amended) The door of ~~claim 1~~claim 15, wherein the door panel includes an upper edge and a substantially vertical edge, and the inflatable seal includes an L-shaped section that is adjacent to the upper edge and the substantially vertical edge.

12. (Currently amended) The door of ~~claim 1~~claim 15, wherein the door panel includes a lower edge and a substantially vertical edge, and the inflatable seal includes an L-shaped section that extends along the lower edge and the substantially vertical edge.

13. (Currently amended) The door of ~~claim 1~~claim 15, wherein the air at the air inlet is warmer than the air at the air outlet.

14. (Currently amended) The door of ~~claim 1~~claim 15, further comprising a heater in heat transfer relationship with the air being forced through the inflatable seal.

15. (Currently amended) A door exposed to an atmosphere of air, comprising:
a door member;
a door panel that is movable relative to the door member;
an inflatable seal between the door member and the door panel, wherein the
inflatable seal defines an air inlet, an air outlet, and an elongate air passageway
therebetween;

a blower connected in fluid communication with the inflatable seal such that the
blower forces the air in series flow from the atmosphere, through the air inlet, through the
elongate air passageway, through the air outlet, and back to the atmosphere; and

The door of claim 1, further comprising thermal insulation, at least a portion of
which is disposed inside the elongate air passageway.

16. (Original) The door of claim 15, wherein the elongate air passageway includes some areas that are more thermally insulated than other areas of the elongate air passageway.

Claims 17-33 (Canceled)

34. (Currently amended) The door of ~~claim 33~~claim 40, wherein the fluid mover ~~is~~comprises a pump.

35. (Currently amended) The door of ~~claim 33~~claim 40, wherein the fluid mover ~~is~~comprises a blower.

36. (Currently amended) The door of ~~claim 33~~claim 40, further comprising a heater in heat transfer relationship with the fluid.

37. (Currently amended) The door of ~~claim 33~~claim 40, wherein the door member ~~is~~comprises a second door panel that is movable.

38. (Currently amended) The door of ~~claim 33~~claim 40, wherein the door is associated with a wall ~~that helps define~~having a doorway, and the door member is stationary and adjacent to the wall.

39. (Currently amended) The door of ~~claim 33~~claim 40, wherein the door is associated with a wall and a floor that define a doorway, and the door member is comprises an upwardly facing surface of the floor.

40. (Currently amended) A door, comprising:
a door member;
a door panel that is movable relative to the door member;
a pliable seal between the door member and the door panel, wherein the pliable seal defines an elongate passageway therebetween;
a fluid disposed inside the pliable seal;
a fluid mover having an inlet and an outlet in fluid communication with the elongate passageway, wherein the fluid mover forces the fluid to circulate in series through the outlet, through the elongate passageway, through the inlet, and back through the fluid mover; and

~~The door of claim 33, further comprising thermal insulation, at least a portion of~~
which is disposed inside the elongate passageway.

41. (Original) The door of claim 40, wherein the elongate passageway includes some areas that are more thermally insulated than other areas of the elongate passageway.

42. (Canceled)

43. (Currently amended) The door of ~~claim 42~~claim 48, wherein at least a portion of the heater is disposed inside the elongate passageway.

44. (Currently amended) The door of ~~claim 42~~claim 48, wherein the fluid is pressurized.

45. (Currently amended) The door of ~~claim 42~~claim 48, wherein the door member ~~is~~comprises a second door panel that is movable.

46. (Currently amended) The door of ~~claim 42~~claim 48, wherein the door is associated with a wall ~~that helps define~~having a doorway, and the door member is stationary and adjacent to the wall.

47. (Currently amended) The door of ~~claim 42~~claim 48, wherein the door is associated with a wall and a floor that define a doorway, and the door member is comprises an upwardly facing surface of the floor.

48. (Currently amended) A door, comprising:
a door member;
a door panel that is movable relative to the door member;
a pliable seal between the door member and the door panel, wherein the pliable
seal defines an elongate passageway therebetween;
a fluid disposed inside the pliable seal;
a heater in heat transfer relationship with the fluid; and
~~The door of claim 42, further comprising thermal insulation, at least a portion of~~
which is disposed inside the elongate passageway.

49. (Original) The door of claim 48, wherein the elongate passageway includes some areas that are more thermally insulated than other areas of the elongate passageway.
